# LETTER FROM THE DIRECTOR

Hello AFF Supporters! Thank you for another GREAT year! In fact, thank you for THE BEST YEAR TO DATE! In 2025 Addi's Faith Foundation broke the million-dollar mark—raising \$1,076,294! I can't begin to tell you how much it means to see the relief this provides to families facing a cancer diagnosis and the research it helps move forward as we work toward better treatments and, one day, a cure. This mission began during one of the most difficult seasons of our lives as our daughter, Addi, bravely battled cancer. In the middle of hospital rooms, long treatments, and so much uncertainty, we experienced the incredible power of community—people showing up with prayers, encouragement, and practical support when we needed it most. Those moments left a lasting mark on our hearts and ultimately inspired the creation of this foundation. Today, because of you, families facing childhood cancer are experiencing that same care and compassion. Your generosity provides meaningful relief to families navigating the unimaginable while also supporting groundbreaking pediatric cancer research. Thank you for standing with these courageous children and their families. Together, we are bringing hope, faith, and tangible impact to a journey no family should have to face alone.

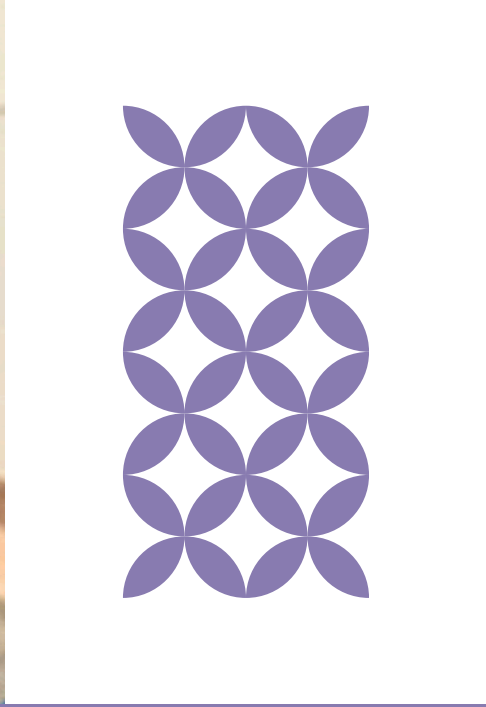

Forever grateful,  
Amber Bender

Founder & Executive Director Addi's Faith Foundation

# FUNDING RESEARCH

\$325,000.00 was given to MD Anderson in 2025!

Childhood cancer research is grossly underfunded. With 12 different types of childhood cancer (and dozens of subtypes) some of the rarest of these cancers can go decades without any progress. Current treatment protocols cause long-term chronic health issues including organ damage, fertility issues, and even secondary cancers. AFF Fund pediatric childhood cancer research initiatives that pinpoint less toxic, more effective treatments.
